

# Supply and Demand

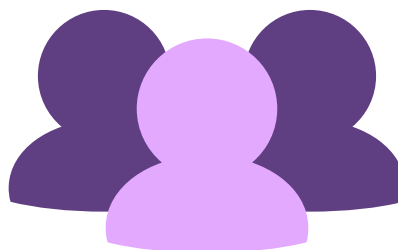

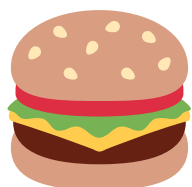

## Supply

“Supply” refers to how much of a product or item is available. For example, a restaurant may have a supply of 4 hamburgers by 2pm on a Saturday, but have 8 hotdogs.

## Demand

“Demand” is how much of a product people want. For example, if 10 people at the restaurant want hamburgers and 3 people want hotdogs, then this is the demand for the food.

# Steps to Play Game

## Entrepreneurs

- Each will receive \$50 in Rozzy money to provide change to consumers buying products.
- Each entrepreneur will receive a packet with products to sell.
- Entrepreneurs must display their Open for Business sign so consumers know they have inventory available.
- There will also be a price sheet. Every item starts at \$5 dollars.
- Entrepreneurs may change the price of any item at any time. Items must be changed in increments of \$5. For example, if an item was \$5, you can change it to \$10 or \$15.

## Consumers

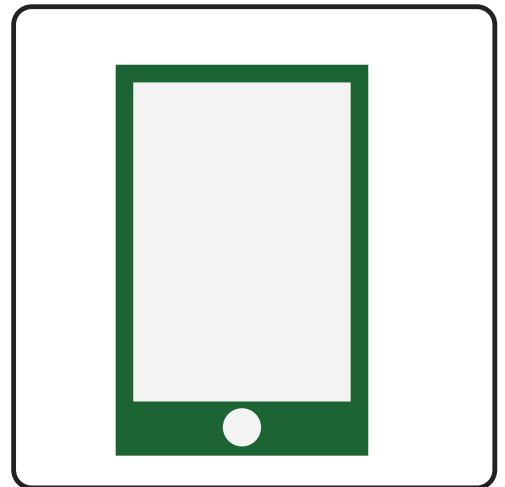

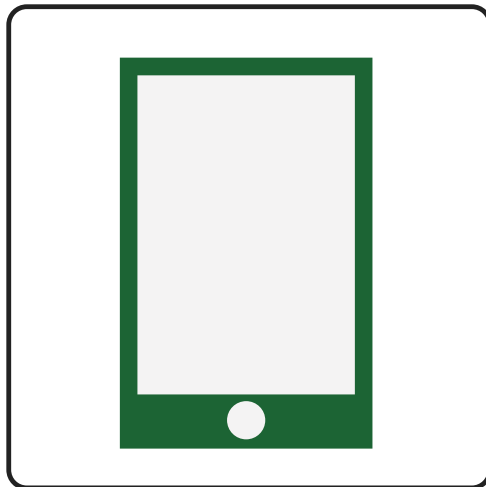

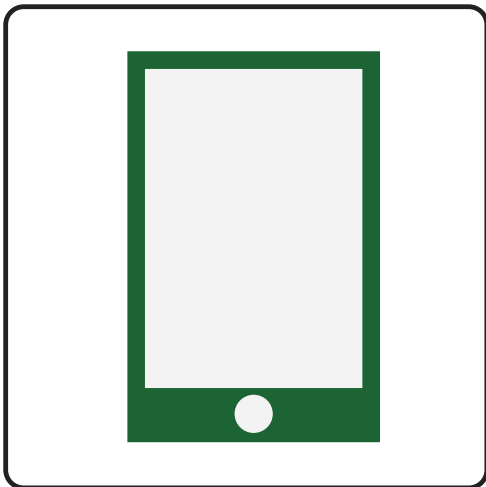

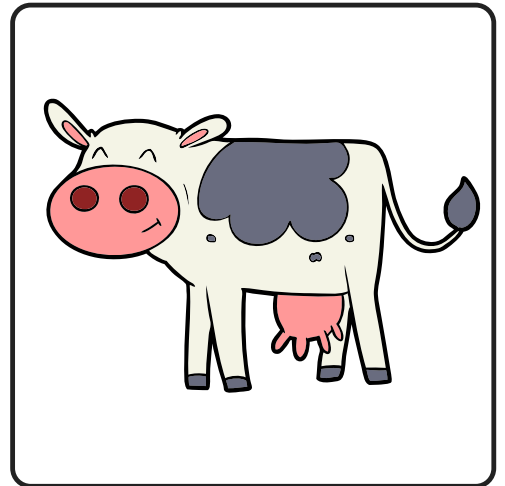

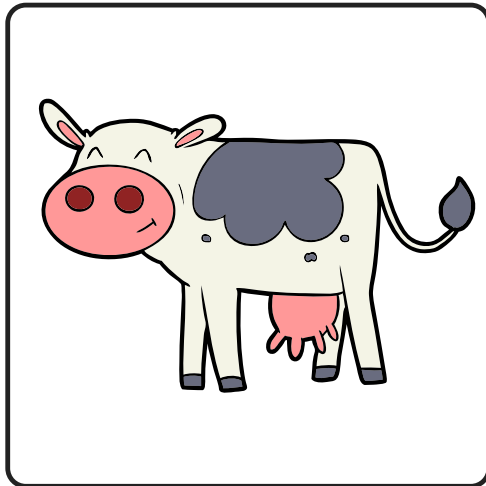

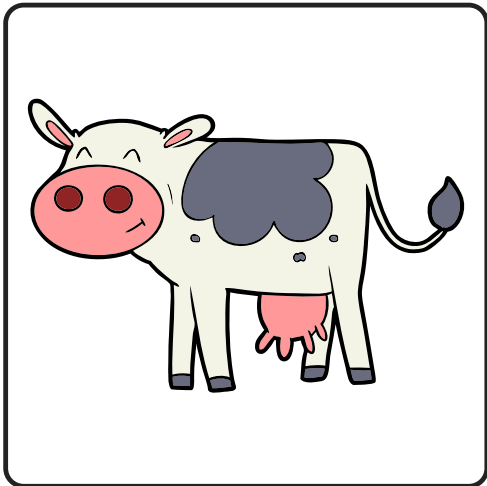

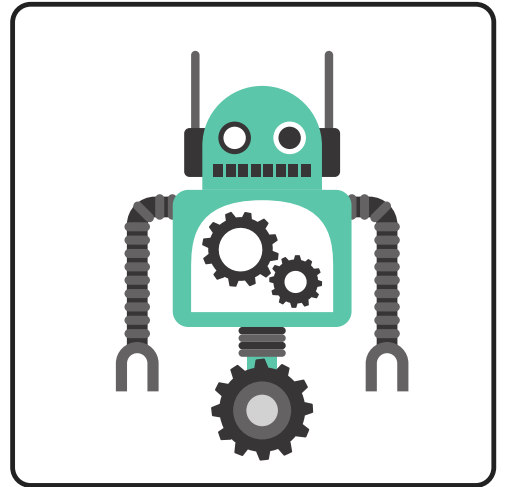

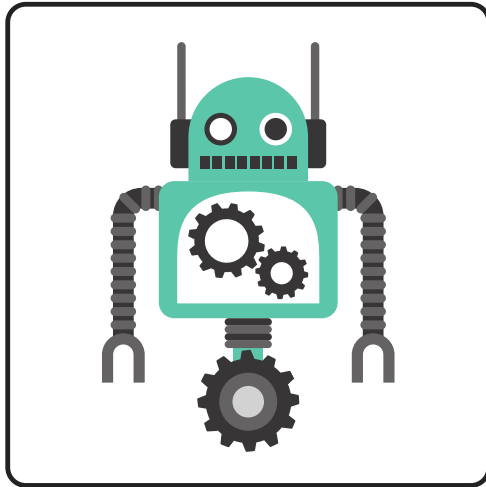

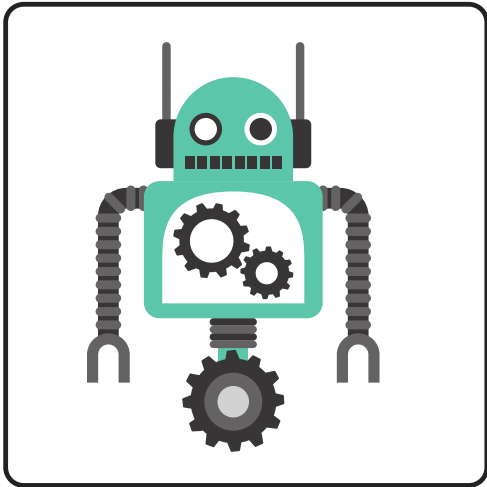

- Each customer will receive \$50 in Rozzy money.
- Customers can purchase items from any entrepreneur at the listed price.

**The game ends when your teacher says STOP or when all entrepreneurs have closed their shops.**
