## Teacher Key

**1. Sod houses and Earth lodges were built by two different groups of people? Which groups made each type of house?**

Indians/Native Americans **made sod houses.**

Settlers **made Earth lodges.**

**2. How does the environment affect the types of houses that were built?**

People in the plains of Kansas only had access to certain supplies. So, they had to make houses out of the materials they could find. For example, the plains didn't have a lot of trees so they couldn't use wood for houses.
